What's New?

The 78th ITER Exceptional Convoy on the Road!

This nighttime convoy has travelled along the ITER route, transporting a key component for ITER. This massive 440 tons element required nearly ten years of manufacturing, involving fifteen European companies. This 78th convoy represents both a major technical and logistical challenge which also illustrates Europe's commitment to this ambitious project.

ITER is moving forward!

Be inspired by experiences from abroad to cement new partnerships and join us at the IBF!
